

This volume contains the proceedings of EuroGP 2000, the European Conference on Genetic Programming, held in Edinburgh on the 15th and 16th April 2000. This event was the third in a series which started with the two European workshops: EuroGP'98, held in Paris in April 1998, and EuroGP'99, held in Gothenburg in May 1999. EuroGP 2000 was held in conjunction with EvoWorkshops 2000 (17th April) and ICES 2000 (17th-19th April). Genetic Programming (GP) is a growing branch of Evolutionary Computation in which the structures in the population being evolved are computer programs. GP has been applied successfully to a large number of difficult problems like automatic design, pattern recognition, robotic control, synthesis of neural networks, symbolic regression, music and picture generation, biomedical applications, etc. In recent years, even human-competitive results have been achieved by a number of groups. EuroGP 2000, the first evolutionary computation conference of the new millennium, was the biggest event devoted to genetic programming to be held in Europe in 2000. It was a high quality conference where state-of-the-art work on the theory of GP and applications of GP to real world problems was presented.

Lewis Dublin: A Topographical Dictionary of the Parishes, Towns and Villages of Dublin City and County, The American Claimant, The Application of the Precautionary Principle in Practice: Comparative Dimensions, The Land and People of Holland, (Portraits of the nations series), Convergence Superboy & the Legion #2, Black Panther (1998-2003) #18, Thor (1966-1996) #388, Pax Romana, Big Apple Safari for Families: The Urban Park Rangers Guide to Nature in New York City,
